Discounted Dental Services

Effective June/July 1, 2018

Your plan sponsor has arranged for a program of dental discounts to be made available to you. These services are not part of your health coverage administered by Fallon Health.

Plan general dentists will extend to you the reduced fee schedule for the services listed below. You will be billed directly by the plan general dentists for these services at the fee listed. These fees only apply when a participating general dentist performs the services. When services are performed by a participating specialist (such as a periodontist, endodontist or prosthodontist) rather than a general dentist, you will receive a 20% discount off the specialist's usual and customary fee. To find a general dentist or specialist who participates in this discount program, visit fallonhealth.org/findphysican or call Customer Service at the phone number on the back of your member ID card.

This discount program applies to two preventive visits each calendar year. A \$10 fee applies to a number of different diagnostic and preventive services, as shown below. There is only one \$10 fee per preventive visit.
