

Important offer details: By responding to this letter you will be enrolling for electricity supply service from CleanChoice Energy – a licensed supplier in Massachusetts. This is not a letter from National Grid. Your utility will still maintain the wires, send your bill, and provide reliable service. This offer is valid for Massachusetts residents in National Grid's service territory. If you choose to enroll, you will receive full terms and conditions further explaining the details of your plan. You always have the option of remaining on or returning to your utility's default generation service by rescission or cancellation of this contract. The Information Disclosure Label will be provided to you with your terms of service. You may also obtain the label at anytime by www.cleanchoiceenergy.com/MALabel. You may also request that a label be mailed to you by calling (800) 510-3498. Offer expires 12/27/2019.

Average Generation Price Information				
Monthly kWh Usage	250	500	1000	2000
100% Renewable Energy Supply from CleanChoice Energy at 11.70¢/kWh	\$29.25	\$58.50	\$117.00	\$234.00
Standard Offer Generation Service at 10.80¢/kWh	\$27.00	\$54.00	\$108.00	\$216.00

Your average generation price will vary according to how much electricity you use. See your most recent bill for your monthly use and the Terms of Service or your bill for actual prices.

Important Rate Information: Our rate is for your electricity supply service and does not include any additional tax, distribution service charges, or other Utility fee or Charge. Supplier rates are not regulated. You will receive a variable supply rate with an introductory price for the first three (3) monthly billing cycles. **CleanChoice Energy's current introductory energy supply rate is: 11.70¢/kWh.** Thereafter, this contract will automatically renew to a variable rate on a month-to-month basis. A variable supply rate may vary each month and is based on a number of costs which may include, but are not limited to: energy, transmission, capacity, ancillary services, renewable energy certificates, RTO system fees and other factors, plus CleanChoice Energy operating costs, expenses, and margins. This list of factors is not exhaustive and no single factor will determine the rate. Additionally, we seek to acquire a majority of our anticipated electricity supply in advance rather than from the spot market. For all of these reasons, your variable rate may not correlate with changes in wholesale market prices or your utility's rates. Your variable rate may be higher than your utility rate or other suppliers' rates.

Product Information: 100% of your electricity usage will be produced by wind and solar generation facilities. Electricity is the product of a mix of energy sources that is delivered over a system of wires. You will not have electricity from a specific generation facility delivered directly to your service address, but CleanChoice Energy ensures that your electricity usage is offset by the generation of energy from renewable energy sources on an annual basis. The energy your home uses will be paired with renewable energy sources through the purchase of Renewable Energy Certificates. For customers in your region, CleanChoice Energy procures renewable energy certificates from the following states: MA, NY, NH, CT, ME, RI, PA, and VT. Other offers may vary.

Additional Information: You may cancel or rescind your enrollment without penalty within three days of receiving a written confirmation of agreement and Terms and Conditions statement. CleanChoice Energy is solely responsible for the content of this marketing material and for the selling to, solicitation and enrollment of customer for energy supply services. CleanChoice Energy makes no representations beyond the expiration date of its contracted price as compared to the standard offer generation service. For CleanChoice Energy's privacy policy, please visit <https://cleanchoiceenergy.com/disclosures/privacy/>.

I have received and understand the terms and nature of my service for my new renewable energy plan.
I authorize this enrollment for 100% renewable energy supply by signing this form. I understand that I can switch my supply back at any time.

Frequently Asked Questions About Switching to Clean Energy

Q. If I switch my electricity to clean, renewable sources, who will my utility company be?

- A. National Grid will still maintain the wires, prepare your bill and provide reliable service. The only thing that will change is that the electricity your home uses will be replenished by clean, renewable wind and solar sources supplied by CleanChoice Energy.

Q. What will happen to my electricity bills?

- A. In short, supporting new renewable energy costs more than polluting energy. For most consumers, the biggest factor determining the size of their bill is the amount of electricity they use. Residential electricity use is typically higher in the winter and summer months when usage is almost always the biggest factor influencing electricity bills.

Q. What if the power goes out?

- A. Call National Grid just as you always have. Outages will be no more or less likely than they've ever been.

Q. Where will the clean energy come from?

- A. When you choose clean energy, National Grid will get your energy from a licensed energy supplier, CleanChoice Energy. CleanChoice Energy will source wind and solar power from farms in your region. For customers in Massachusetts, CleanChoice Energy procures renewable energy certificates from the following states: MA, NY, NH, ME, RI, PA and VT. Other offers may vary.

Q. Who is CleanChoice Energy?

- A. CleanChoice Energy is an energy supplier licensed by the state of Massachusetts offering only 100% renewable energy.

Q. How is renewable energy different?

- A. Renewable energy is produced from wind and solar sources. Unlike conventional electricity sources, renewable sources do not produce carbon dioxide or contribute to air pollution.

Q. What if I want to switch back?

- A. You can switch back at no cost and with no interruption of service.

Q. Outside of supply charges, are there any charges or fees if I decide to switch?

- A. We charge no fees to switch and no cancellation fee if you change your mind.

Q. Can I switch to clean energy if I rent my home?

- A. Yes. If you currently receive and pay your electric utility bill every month on your own, then you can choose clean energy. Just sign and return the form enclosed.
